In addition, the permit fee for each right-of-way cut exceeding 100 ft in length shall be \$15.00 per 100 ft., up to a maximum of \$500.00.
Payment is expected at the time permit is issued, unless otherwise stated.

Amount due this permit: \$ Date Paid Check No.

PERMIT TERMS In consideration of granting the permit applied for herewith, the applicant hereby agree to the permit terms listed on the permit application and any special conditions indicated below.

Special Conditions

City of Goshen " Approval of Permit"

Street Commissioner City Engineer Date

Right-Of-Way Permit Terms

The Permittee Shall:

- 1. Perform all work requiring a right-of-way cut permit in accordance with the following permit terms and Goshen Ordinance No. 3659.
2. Application of the permit is expected prior to the start of work.
3. The Street Commissioner or duly authorized representative reserves the right to stop any work at any time.
4. Any permit issued is limited in time by three months from actual start date, unless extended by the Street Commissioner. Applicants not completing work within the three month time limit must apply for a new permit.
5. In areas effecting vehicular and pedestrian traffic, erect and maintain all necessary and appropriate warning signs, barricades and warning lights in accordance with the manual on Uniform Traffic Control Devices for Construction and Maintenance Areas. Any disruption to traffic shall be kept to a minimum and at least one lane of traffic maintained unless complete street closure is approved under "Special Conditions." Permittee must notify 911 at any time a street is closed to emergency vehicles.
6. Move or remove any structures installed under this permit, at permit holders' own expense, should future traffic conditions or road improvements necessitate.
7. Not to interfere with any existing structure along or across a city street, without permission from the owner of the structure.
8. Bore in pavement areas unless it is impractical. If a cut in the pavement is necessary, then all cuts shall be initiated with a saw cut, a minimum of three inches deep, and the cut shall be one foot wider than the trench to excavated, each side.
9. Meet all City of Goshen specifications as to the size and quality of any pipe or conduit used in connection with the work completed in this application.
10. Backfill around the pipe or conduit and the trench of any cut by thorough tamping in four-inch layers or lifts to achieve high compaction. Backfill material under pavement shall be flowable fill above the granular pipe embedment, except when in water or otherwise authorized, then the backfill material shall be granular(no organic) and compaction checked by the City prior to pavement restoration. In other locations, the backfill material may be material removed from excavation. Temporary surface in pavement areas shall be a minimum of six inches deep of crushed limestone and maintained in a smooth and uniform condition until final resurfacing, a maximum of four weeks.
11. Restore any pavement, driveway or sidewalk removal with the same type of material to the same or better condition than that removed. Any sod removed shall be restored by replacement or proper seeding to its original condition.
12. Make repairs if any settling occurs within one year after completion of the work.
13. Assume all responsibility for any injury or damage to persons or property resulting directly or indirectly from the work contemplated in this application. Pavement restoration shall be by a paving contractor approved by the City, based on paving experience and access to proper equipment for satisfactory performance. Approved contractors will remain on the City's approved list of paving contractors as long as satisfactory work is done and in compliance with permit terms.
