

FLAT SEWER CUSTOMERS

We have some customers that have their own well and are only paying for sewer service. These customers pay a flat rate each month as we have no way to monitor how much sewer is actually being used. Customers who only have sewer can purchase a meter to become what we call “metered sewer” customers. The meter would be put on the customer’s well to monitor how much water is being used and then instead of the flat rate you would be billed based only your consumption. For more information and costs associated with this, please call the billing office at 574-533-9399.
