Application Requirements

Establishments in the Downtown Business District serving food and/or beverages as the primary offering, or banquet facilities and rentable space permitted to allow catering services at the facility may request approval from the City of Goshen to place additional temporary seating outside of the facility in the portion of the public right-of-way directly adjacent to the property. For the purposes of this document, the Downtown Business District is defined as the area being along or between 2nd Street and 5th Street while also being along or between Pike Street and Madison Street. The portion of the public right-of-way directly adjacent to the neighboring properties may also be utilized upon written consent of the that property owner as long as all utilized portions of the right-of-way are contiguous. All approved installations and placement of private effects within the public right-of-way must be temporary and will only be allowed from April 1st to October 30th, at which time, the outdoor seating within the right-of-way privilege expires and the right-of-way must be returned to its original condition. Applications must be submitted on a yearly basis and all requests to the City of Goshen will require the following criteria be met prior to approval:

- All seating must allow access to public utilities, waste collection receptacles, hydrants, alleys, manhole covers, ADA parking spaces, and driveways; and must adhere to all standard codes, rules and guidelines for such establishments, including those set forth by the Indiana Alcohol and Tobacco Commission, if applicable.
- At a minimum, a 5-foot walkway must be maintained free of all obstructions on either:
 1. A portion of the sidewalk with a cross slope of 2.0% or less, or
 2. The most level 5-foot wide section of walkway as determined by the Engineering Department.
- If table service is to be offered, separation must be provided between seating and walkway through placement of a vertical barrier with a minimum height of 36 inches. The barrier must be free-floating, not damage the sidewalk surface, and not cause a trip hazard within the defined walkway.

- All necessary electrical connections must be encased in a cord safety cover.

Temporary walkways and seating areas constructed in adjacent parking spaces must be approved by the Board of Public Works and Safety, will be approved subject to parking demand, and will require the following criteria be met:

- All temporary walkways and seating areas must be on constructed surfaces that are a minimum of four inches high along the travel lane of the adjacent roadway, covered in slip-resistant material, and have a minimum load bearing weight of 100 lbs./sq. ft.
- All temporary walkway and seating construction must allow the existing drainage patterns to be maintained and must provide a clear area adjacent to the curb in the roadway to allow runoff to flow. The required opening shall be no less than 12 inches in width and have a height of two inches or the height of the adjacent curb, whichever is greater.
- Constructed walkways must meet all guidance set forth in the U.S. Access Board's Proposed Rights-of-Way Accessibility Guidelines and provide a minimum walkway width of five feet.
- All temporary walkways and seating areas must be separated from the adjacent roadway with a vertical barrier that is a minimum of 36-inches high. The vertical barrier must be rigid, fastened securely to the constructed surface, and have no passable gaps greater than 6-inches. The vertical barrier, or delineators/bollards with reflective tape placed in addition to the barrier, must be placed between 18 and 36 inches away from the lane line of the adjacent travel lane and must be easily visible to the traveling motorist on said facility.
- A 3-foot clear area must be provided as a buffer between any construction and the closest parking space or driveway and the installation cannot obstruct vehicle sight lines as determined by the Engineering Department.
- Where requested by the City, additional separation and or protection may be required on the upstream end (end at risk of vehicle impact) of the construction. These determinations will be based on vehicle speed and a driver expectancy* in the adjacent roadway.

***Driver expectancy** refers to a driver's readiness to respond to hazards that are expected to be in a particular type of roadway corridor. If a hazard is atypical to the corridor than it is considered to be outside the expectancy of the driver.

Operation and Maintenance

Applicants are solely responsible for the maintenance and upkeep of their installations. This includes all duties and costs related to keeping the installation clean and in good condition. Areas should be cleaned each day of operation and any damage repaired promptly. Proper maintenance is a condition of the permission to install, and failure to conduct proper maintenance will result in the loss of permissions. The following list should be used as a minimum maintenance checklist:

- Wipe down table and chairs
- Clean up rubbish within and around the area
- Sweep in and around the area
- Remove debris against the outside edge of the barrier and along curb to help maintain free flow of runoff
- Water and maintain installed plantings

The City reserves the right to remove the installation if emergency or utility work needs to be conducted. The applicant will be responsible for all costs associated with the disassembly and removal of the installation.

Further, the City may, in its sole discretion, limit, reduce, or revoke any permit issued that presents safety or traffic circulation concerns.

- A. General Terms and Conditions.** Applicant acknowledges that this and any permit issued are revocable, at the sole discretion of the City, and temporary. As a result, any permit issued by the City shall be a revocable, temporary license permitting the applicant to operate an outdoor seating area for a limited period of time. Any permit issued creates no other property interest than a revocable license. This revocable right-of-way privilege for outdoor seating is subject to modification or revocation at the City's sole discretion. application. Applicant agrees and acknowledges that for all other installations the City's Engineering Department will review the application and grant, grant with conditions, or deny the application. Applicant agrees and acknowledges that the Board of Public Works and Safety or the City's Engineering Department must approve the permit prior to the start of work. Applicant agrees and acknowledges that the City has the authority to condition or revoke approvals deemed to have been improvidently granted or inappropriate in light of new information or changed circumstances. In addition, the City may impose conditions on new or existing approvals in order to promote the public health, safety, and welfare and to mitigate adverse impacts that have arisen or may arise in connection with a new or expanded outdoor seating area approved under this program. Anyone who wishes to challenge the approval or denial may seek reconsideration by the City Engineer by submitting the appeal to the approval or denial via email to the City's Engineering Department. This shall be the exclusive means of appealing any approvals granted or revoked under the program. The City Engineer shall have the sole discretion to approve or reject a challenge, but such determination shall consider application requirements, program guidelines, and public health, safety, and welfare needs.
